Chapter 1:
How Bad Do You Want To Be A Millionaire

“Do You Want To Be A Millionaire?”

If your answer is YES, you’re at the right place. And here’s why…

Success is not an accident; your choices determine your life. But the million-dollar question is - How do we make these choices?

And here’s the good news – Success Leaves CLUES!

Becoming a millionaire requires nothing more than a Blueprint to guide you to it. However, there are simply too many fake millionaire tips out there that deter your success.

But that’s not going to happen today. Because what you’re about to discover is the actual roadmap most millionares use to achieve their monstrous wealth, based on REAL case studies and countless interviews.

Without further ado, let’s dig into the Millionare Blueprint.

What We Think, We Become

Believe it or not, we are already set to become whom we envisioned ourselves to be in the future, whether we know it consciously or subsconsciously.

Close your eyes for a moment. Think of a 60 years old man or woman. How does he or she look like? Is he or she slumped over or standing strong with a toned body? Now how's the facial expression, is it happy, or sad?

Believe it or not, this is who you'll become when you're 60 years old! Your destiny has already been set, by no other than YOU.

Never ever underestimate the power of your thoughts, your mindset. Likewise, the rich has a way different thought process than the poor. And that's exactly what set aside the rich from the poor.

The Human Brain

What makes human beings different from other living creatures is our unique intelligence. Our brain is what made us the king of all species, and contributed massively to our generations' progress over the millenias.

Butthe brain is actually similar to the rest of your muscles; it can only grow stronger upon use. Also, the brain acts like a sponge and it easily absorbs anything that it comes in contact – regardless or good or bad.

So, you have to be vigilant to the kind of information you read, the people you mingle with, and also your immediate environment. Focus on 'feeding' your mind with the empowering information in order to grow rich and fulfilled.

Invest in self-help books, biography of millionaires, success courses, investment talks and so on. Also, mingle with like-minded people who share the same vision as you.

There's also a popular saying by Jim Rohn, "You are the average of the 5 people you mingle with." Which is true! So again, be incredibly vigilant to whom you choose to spend time with. Remember, Success attracts Success.

The Biggest Misconception& What The Rich ACTUALLY Do

One of the greatest misconception about the wealthy is that "You have it; you flaunt it!" to show others that you're loaded. Well, that's what being portrayed by the medias anyways – So called social media 'Millionaires' showing off their private jet, luxurious lifestyle, and mountains of cash.

However, based on recent research – That's not entirely the truth. Believe it or not, most millionaire or billionaire families rather live modestly. Perhapsthere might be millionaires in your neighbourhood and you'd never know it.

Majority of the millionaires look like regular folksat first glance. They own regular houses and automobiles. They might have a few luxuries but most average millionaires can't be spotted on a daily basis as they prefer it to be that way and don't show off their wealth.

But they have one thing in common, that is financial maturity. They know what it takes to be rich and stay rich.

Think about it for a second… What is your WHY or PURPOSE to make a million dollars?

For many, it's because they want to be Financially Free. A short definition of Financial Freedom is the ability to live the lifestyle you desire without having to work, or rely on anyone else for money.

But you can never achieve this without knowing how to manage your finance.

So, you must also know how rich people manage their assets and finance to join their rank. For starters, you have to know the difference between an asset and a financial obligation. An asset is something that generates cash in your pocket without you having to execute much work for it.

Another word for financial obligation is expenses, something that takes cash out of your pocket.

You become truly financially free only when your assets exceed your financial obligations. In other words, the main objective of the money game is to earn enough passive income to pay for the lifestyle you desire.

Things You Won't Learn At School

Did you know that 70% of the wealthy families lose their wealth by the 2nd Generation, and a shocking 90% by the 3rd?

This is a cold hard truth plagued the wealthy families for decades. So why is that so? The number one reason for this to happen is due to the lack of smart money lessons.

Statistic shows that up to 65% admit that they have disclosed little to none about their wealth to their children. And the main reason is because people were taught not to talk about money! They worry that their children will become lazy and feeling entitled. In the end, most of them have zero clues to the value of money and how to manage it.

To make things worse, financial education is not even covered in schools!

In order to stay away from this death hole, we must ensure our offspring receives the much-needed financial literacy and prosper.

For instance, you need to teach your children the real value of money and how to master the money game.

There's a Chinese proverb that fits in perfectly, "Give a man a fish, and you feed him for a day. Teach a man to fish, and you feed him for a lifetime."

So don't be afraid to teach your children basic money management skills. You can begin by teaching them how to be financially free, introducing books and courses on money lessons.

If you don't know how to manage your money – Don't worry. This Millionaire Blueprint covers all basics on the money game that you can pass on to your future generations.

We Get What We Ask For

Have you watched or read 'The Secret'? If you did, most likely you're convinced that the Law of Attraction works. But more often than not you're wondering why you simply can't manifest money in your life, and struggle to pay the bills with little to no money in the bank. If you're one of them, I'm going to give you some pointers.

The power of manifestation does not come from the outer self, but it actually originates within you. What you manifest in reality is the fruit of the seed you sow in your mind.

The key to unlock the power of manifestion is Mindfulness.

Take a moment and reflect on the words you use when it's about money, the thoughts and beliefs you have about wealthy people, or how you spend money.

Is money the roof of all evil?

Is it more enlightened to be poor than rich?

Does getting rich takes too much work and struggle?

Are you not "good enough" to be rich?

Does getting rich means everyone will want something from you?

Believe it or not… All your answers will shape your current reality.

One thing you should remember is to watch your thoughts at all time. Again, be vigilant! And when you do, you'll activate the power to manifest money in your life and never be broke again.

Experts suggest that Positive Affirmations are the best way to hack your way to rewire what you think of money subsconsciously.

For example, say aloud, or to yourself, 'I'm a cash magnet. I merit financial abundance. I'm now drawing in all of my wildest desires. There's more than enough cash for everybody, including me.'

These phrases and sentences will pick your energy vibrations up to an elevated level, and help to re-train your brain to believe and live inside an abundant life-style.

This likewise helps you to be alert to any fresh chances, which come your way. Let's face it. 1,000,000 dollars is likely not going to turn up in a suitcase on your porch, unless you get into some truly fishy stuff. You are likely going to have to make some sort of moves in order to produce those 1,000,000 dollars, so you are going to want your brain to be prepared to pick up on the hints.

When you start drawing in abundance in little ways, you will experience the snowballing effect that affects almost every areas of your life. Like any habits, the process will get simpler and abundance will overflow to other areas such as your emotional health, physical health, family & friends and so on.

Don't forget, it's all the same to the world. It's you who trusts you're allowed to draw in a new auto. Cash is cash to the universe, and abundance comes in all forms.

So let those affirmations with unstoppable emotional strength attract unlimited wealth to you in no time. Soon, you will realize that opportunity is everywhere and you'll be spoilt by the choices you have to make lots of money.
