Chapter 2:
The Millionaire Brain

S1: In this video, we'll talk about the millionaire brain.

We'll start off by literally dissecting the mind of a millionaire and learn everything we can from it. Often times, the main reason why they're able to gain their monstrous wealth – is not by accident.

S2: The Wealthy Mindset

The key to changing any areas of your life is your mindset; be it your health, wealth or relationship. Your mindset and psychology is one of the most important things that will determine your success with your businesses and your life.

S3: Often times I'm reminded of something I heard once from Tony Robbins, which is, "80% of your success is your psychology, while only 20% are the mechanics".

In other words, 80% of your success comes from your mindset, your psychology, your belief systems, while only 20% are the step-by-step, the 'how to'.

S4: In today's information age, it requires almost no effort to study the information on how successful individuals became who they are today.

S5: However, when given the same information, the exact same steps or 'how to' information to two different people, why does only one of them succeed while the other doesn't?

S6: One person could go on and take that information and apply it, take massive action and achieve incredible results, radically change their life, and create the lifestyle that they truly desire; whereas the other person might go on to struggle and maybe fail despite given the exact same opportunity and information.

S7: What's the difference between those two individuals?

S8: Well, the only difference is the psychology, the mindset of the individual. You must make sure that you take action and apply what you've been given if you wish to achieve amazing results.

For instance, the Millionaire Blueprint works, and it has the potential to change your life, but it will only work to the extent that *you* do. It all boils down to how badly *you* want to be a millionaire and how much effort you're willing to put in to achieve that.

S9: The Millionaire Brain is no exception; you must constantly work hard on yourself, your psychology, and your mindset to achieve unstoppable success. By developing your mindset and cultivating the millionaire's principles that I'm going to share with you, it will help you achieve your dream of becoming a millionaire.

But everything begins from yourself, which is why I really want to emphasize to work on your mindset and psychology as well as the principles taught in the millionaire's blueprint.

S10: Next, we'll talk about the **4 Rules To Financial Success**

Now that you understand the power of mindset, you're all set to empower your mind and develop a millionaire mindset.

The question is 'How?'

S11: Here are the 4 Rules of Financial Success proven by multiple millionaires to help you achieve real financial success.

- Rule #1: Your income must be more than your expenses
- Rules #2: Treat money like a jealous lover
- Rule #3: Say NO to Debts
- Rule #4: Assets, assets and assets

S12: Rule #1: Your income must be more than your expenses.

So you must decide wisely between your needs and wants. Ask yourself this question when you're purchasing something 'Is this a necessity for me or a liability?' Same goes to investment; make sure you know what you're investing in order to ensure best returns.

S13: Investing blindly is no different than wasting your money away.

S14: Rules #2: Treat money like a jealous lover

That means you have to pay a lot of attention to money and never leave it out of your sight, as if it's your lover. You must *think* of money, *think* wealthy and avoid disempowering beliefs about money or else your lover will leave you. By following this rule, you will attract more money to you and live a life of abundance – Because money loves you!

S15: Rule #3: Say NO to Debts

Millionaires have no debts, so act like one if you want to be a millionaire! If you're on a certain loan right now, plan ahead and pay it off quick. Debt is like a ghost that latches itself onto you, demotivating you and giving you the disempowering energy to hinder you from climbing the millionaire ladder.

S16: You must get rid of this burden right away, say no to debts! And don't go purchase those expensive liabilities such as cars to increase your debts.

S17: Rule #4: Assets, assets and assets

The surefire way to catapult you to riches is to own as many assets as you possibly can to raise your total net worth. This can be in the form of business, bonds, stock shares or real estate. You should be focusing in investing into assets when you've gathered enough cash flow to win the money game.

By respecting these 4 rules religiously every day, you can absolutely make a big difference in your fortune. In conclusion, the millionaire brain is a powerful thinking process to become extremely wealthy and trust me – you deserve to be RICH and live the life you ever dream of!
